

[FREE Horse Conference](#) and you have One More Week for Clarity Consultations

Hello ,

Do you want to meet with Dr. Jeff? The clarity calls are available until Aug 7th. Book now if you want to have the \$99 meeting with him.

I had a conversation with a customer about a titer test she had done on her cat. The kitten got an 8-week vaccine done, and a month later, a titer test revealed that the antibody level was high—a great response to the vaccine. Then the vet dropped the bomb—s/he wanted to revaccinate because the “immunity may not last a year.” See what I told this client [HERE](#).

In the second new blog, watch this if you have a dog with a weak back end. Dr. Jeff explores what can cause this problem, which guides you on what to do. Check it out [HERE](#).

Imagine you don't know where to turn. The hardest part is seeing a veterinarian that thinks like you do, and that means having a holistic approach and not be so reliant on drugs and conventional diets and treatment.

Do you want to get HORSE educated? The Horse Conference is in replay Aug 1-3. You can sign up [HERE](#).

See you in class,

Dr. Jeff and Lino

Want to Get Holistic Answers?

Unfortunately, it can be hard to find a holistic veterinarian. If you want a simple way, this is where Dr. Jeff can help. It is easy to set up a clarity call.

What is it, you ask? It is a dedicated 30 minute call with Dr. Jeff. If you want a way to find out about your pet's illness, explore holistic ways of treatment, understand the results of test and what they mean for you, what to do

Vaccines, nutrition, parasite control.

You have Dr. Jeff's full attention for the 30 minutes. If you need longer with a review of your pet's records and creating a plan going forward, you can also order a full consultation.

Check them both out [HERE](#):

You get a vaccine titer done, and it shows protection. Why would a vet still recommend revaccinating? See how to handle this.
